

Testimonials

From: A Mercedes & Import Service Center

Location: La Puente, California

We purchased the Qwik Draw Coolant Flush Machine recently and we are very satisfied with the outcome and the new source of income that it generates.

Thank you, Arturo Martinez - Owner

From: Lube Express

I am writing this letter to inform anyone seeking to provide an excellent radiator service or improve a service already in existence. The Qwik Draw Coolant System Flush Machine has revolutionized the radiator service industry. We have provided radiator services at our locations for about five years and with our old equipment encountered quite a few cars that were not user friendly. With the Qwik Draw Coolant Flush Machine we no longer encounter those nightmares. The Qwik Draw machine can service any vehicle large or small. It is very simple to use and almost any technician can easily be trained to operate the machine. We saw an increase of radiator services immediately after purchasing the equipment. We liked it so much we bought another one. The machine can easily be cleaned and stored anywhere. If you see to increase sales and provide excellent radiator services the Qwik Draw coolant System Flush Machine is your answer.

Jason Burnett - Manager

We looked at many different cooling system-flushing machines before purchasing your Super Coolant Flush/Changer Machine. We have been using a machine where we had to disconnect the upper radiator hose to hook up adapters so we could flush the cooling system taking 45 minutes or longer to service. Only a couple of our employees felt comfortable using this style of machine. I looked at many different flush machines and after seeing a demonstration of your machine I decided to purchase the Super Flush Machine. Now every employee we have knows how too and wants to use your Super Flush Machine, and your machine takes us about 10 minutes to perform a flush service. It has been just over a year since we purchased your machine and we are up over 400% in cooling system services over the previous year.

Sincerely, Tim Fuson - Owner

Just a note to let you know how much we appreciate the Qwik Draw coolant changer. I am particularly impressed with the vacuum method of extracting the coolant. Since there is no need to disconnect any hoses, the Qwik Draw provides a much more efficient, cleaner, and safer procedure to the vehicle and for the tech.

Sincerely, Robert Monroe - Service Director

From: Ward Service

Location: La Puente, California

My name is Oudi and I use to own a shell station when I saw the Qwik Draw. It took a while to build this new shop and I bought a Super Flush. Now I don't concern myself with the new types of coolants out there because I can fill the tanks with all the different coolants and I'm ready to go. The machine works great and it is a great addition to my shop. I keep my new coolant and my waste coolant way in the back and this machine allows me to fill it up and empty it with out having to drag the air hose back there. I don't think there's another piece of equipment that gives me a better return for 5 minutes of work.

From: AAA Radiators

Location: Los Angeles, CA

My name is Vicente, owner of AAA. I bought the Qwik Draw because the inspector demanded that I not spill antifreeze on the floor but this is almost impossible because I fix radiators and I have to remove them. With the machines I empty the system first then I disassemble and I don't have the inspector on my back. Now I have another source of income because I also do coolant service.

From: Advance Auto Care
Location: Burbank, California

My name is Raz and I bought a Fast Flush Qwik Draw more than a year ago. I want to say that it is a trouble free machine. It is very fast for coolant flushes. I used to do more smog than anything here but the Qwik Draw has increased my profit so much that I am focusing more on service now. I like the fact that I don't have to have the air connected to do a coolant flush or to empty out the old coolant. The Qwik Draw is worth the price I paid for it.

From: Brother's Tires #2
Location: Montebello, California

I like the Qwik Draw because I can do radiator services fast and get back to other things. I service some tow trucks and the fast flush with three tanks has a lot of capacity to service any size system and any type coolant. I have increased my revenue due to coolant services.

From: Diego's Auto Repairs
Location: Montebello, California

The Qwik Draw Fast Flush has been a great profit center for my shop. I do a lot of smogs and most of my customers do not maintain their antifreeze so this has been a great service for them because I help them save money in expensive repairs. I don't have to worry about changing coolants in my tanks because I have the Dex in one tank and the green in another ready to go when I need them. This is a strong machine.

To whom it may concern:

If you're thinking of buying a coolant flush machine, take a good look at the Qwik Draw or you may be sorry later if you buy something else. I have had this machine for over a year now without a single problem. When I first had it demo's to me I liked it but I thought it was pricey. I bought it anyway. A friend of mine bought a cheaper machine and like they say "you get what you pay for". He's had his tanks break a few times and has had to fight to get it fixed. He's now considering finding another sucker to sell it to, and buying a Qwik Draw too. Good work to Link New Tech!

My name is Juan Mendoza and I own this shop. I bought the Qwik Draw Super Flush with the 4 tanks close to a year ago and I have not had a single problem with it. It is so easy and quick to service radiators without making a mess, which is why we didn't do that service before. This is a money making machine.
Thank you, Juan Mendoza

From: J & L Automotive
Location: Montebello, California

My name is Juan I bought the Fast Flush (3 tanks) and I wanted to let people know how good this machine is. It does the coolant flushes in less than 5 minutes. It is very strong. One of my employees hit it with a car and nothing happened to the tanks, the bars around it protected it.

From: Nelson Auto Repair and Smog
Location: Los Angeles, California

We purchased the Qwik Draw because I knew as soon as I saw it that it would last me a long time because of the way it's made. It was a problem doing flushes before, but now it's very easy. We also use the Qwik Draw to empty the system before we take a hose off, do a head job or anytime we open the cooling system. This avoids messes on the floor and we can save the customer's antifreeze for them.

From: Nino's Auto Service
Location: Whittier, California

My shop shares the lot with a car wash and I have a lot of traffic so I needed something that could do quick radiator services and the Qwik Draw definitely does that. I was asked to write a testimonial as to my opinion on the Qwik Draw a few months back but I refused even though I liked it very much. The company claims that it is maintenance free and I wanted to see if this was true. Well it's been over a year since I bought the 3 tank machine and I haven't had to call for any repairs or problems at all. If I had the need for another coolant flush machine I know what I would buy.
Sincerely, Nino

From: Raul's Automotive
Location: Azusa, California

I bought the Qwik Draw because my customers would ask me to flush their coolant but it took too long to be profitable and there was a big mess on the floor no matter how many pans I put under the radiator. Now I make money doing flushes and I service my customers. The most important thing is that my technicians like using the Qwik Draw. This past summer was very good for me doing coolant flushes.

From: Sornoso Auto and Truck Repair
Location: Covina, California

I like Qwik Draw because it's great technology built well, strong-large capacity tanks, billet aluminum and heavy duty hoses. I do a lot of water pumps and this machine helps me recover the coolant before it ends up on the floor. I've also found it to be a good new source of income.
David

From: Vic's Automotive Center
Location: Gardena, California

I Like the Qwik Draw because it's easy to work and fast. I appreciate the quick response from technical support at Link New Tech when I called.

From: Toot'N'Totum Car Care
Location: Amarillo, Texas

The Qwik Draw Coolant Exchange Machine has changed the way we do radiator servicing, Previous methods used required removing radiator hoses which is extremely difficult and labor intensive in most instances. Qwik Draw's method of providing a 100% fluid exchange is just the ticket and provides the customer with the exact service they need. Best of all, it allows our stores to do so in a timely manner with a very attractive machine. The versatility and dependability of this machine is priceless, therefore, forcing our company to replace less durable models at all locations.

From: Garry and Warren Smith Group
Location: Oakleigh, Victoria

We purchased the Qwik Draw Coolant Flush Machine recently and we could not be happier with its ease of operation and efficiency. We looked at many different coolant flush machines before purchasing your Qwik Draw machine and nothing came anywhere near its ease of operation. In the past we had to disconnect radiator hose leading to potential OH&S issues with hot coolant spraying everywhere, not to mention the mess that was always left from this procedure. We would spend around 30-40 minutes flushing the old fashioned way, not anymore. Now every employee will use this machine without any hesitation. We are still able to charge the recommended factory time for carrying out a coolant flush, but now only spend around 5-10 minutes from start to finish. The longest time if the engine is could would be waiting for the thermostat to open. The machine is very simple and easy to use. The ability of it to remove the old coolant by using vacuum and storing it in a separate container is amazing, quick and very clean, in fact there is no mess. This also helps us with OH&S as there is no coolant left on floors leading to potential falls by employees like before. Safety these days is our number one priority and this machine is tops in preventing this. The machine is also very easy to clean and store away. All in all even though we have only had it a short time it has been quite profitable for my department and have no doubt it will pay for itself in a very short period of time.
